DREW BAKER

SENIOR SOFTWARE ENGINEER | Front-End | Angular, TypeScript, RxJS | AI Enablement

Celina, TX 75009 | (662) 202-8802 | drew.baker.97@gmail.com | linkedin.com/in/drew-baker

PROFESSIONAL SUMMARY

Senior Software Engineer with 6+ years of experience building enterprise web applications in Angular, TypeScript, and RxJS across retail and financial services. Front-end team lead for three applications, driving architecture and modernization from micro-frontends to unit test suite design. Leads AI enablement for GitHub Copilot and agentic AI workflows.

TECHNICAL SKILLS

Languages & Frameworks: TypeScript, JavaScript, Angular, RxJS, HTML5, CSS3/SCSS, Java, Spring Boot, SQL, Python
Architecture: Front-End Development, Micro-Frontends, Module Federation, Nx Monorepo
Testing & DevOps: Unit Testing, Jest, Test Automation, CI/CD, GitLab, Git, Docker, AWS, Google Cloud (GCP)
AI & Practices: GitHub Copilot, Agentic AI, Prompt Engineering, LLMs, Agile/Scrum, Remote Team Building

PROFESSIONAL EXPERIENCE

SENIOR SOFTWARE ENGINEER (FRONT-END TEAM LEAD)

H-E-B | Remote | Apr 2023 – Present

- Implemented a micro-frontend architecture with Module Federation in an Nx monorepo, splitting the app into independently built modules so multiple teams can ship in parallel without conflicts.
- Spearheaded developer enablement for an org-wide AI council, driving GitHub Copilot adoption via guides, training, and instruction templates; built cost-effective agentic workflows that automate repetitive tasks.
- As front-end lead on a cross-team assignment, built scheduling and bulk-edit workflows with API integration to help retire a legacy operations system, and led a geospatial mapping proof of concept.
- Shipped 300+ user stories and tasks across 12+ role-based workflows for the enterprise platform used to onboard every product sold in the company's stores, helping migrate users off a legacy application.
- Improved engineering processes by leading unit test suite design and modernization (shared testing utilities, CI scripts, migration playbook) and automating release-branch creation.
- Migrated 16 pages and shared libraries across design systems and led framework upgrades for two apps.
- Supported front-end features with targeted Java/Spring Boot work, adding REST endpoints and business logic.
- Resolved 90+ defects and production incidents and built admin tooling for transaction diagnostics, feature flags, and role-based access control (RBAC), reducing reliance on manual database queries.
- Recognized as an all-star campus recruiter and ambassador; mentored and onboarded new engineers.

PRINCIPAL ASSOCIATE SOFTWARE ENGINEER (FRONT-END TEAM LEAD)

Capital One | Plano, TX | Mar 2021 – Apr 2023

- Led the frontend team for an internal data-processing platform, guiding technical direction and releases.
- Designed and built a reusable core Angular data-table component, optimizing speed and usability.
- Built Angular features and advised backend engineers on API design, improving backend API performance.

ASSOCIATE SOFTWARE ENGINEER

Capital One | Plano, TX | Feb 2020 – Feb 2021

- Built data visualizations with SQL and Python, expanding analytics and monitoring capabilities by 100%+.
- Advanced to technical decision-maker, re-architecting the site for resiliency and building custom Slack alerting.

EDUCATION

BACHELOR OF SCIENCE - COMPUTER SCIENCE | Mississippi State University | Dec 2019

GPA: 4.00 | Stephen D. Lee Scholar
